Typescript, NextJS, ReactJS, NodeJS, Sequelize, Python, Java, C++, Azure, Jupyter,

Projects

SOIL (FullStack Grocery Website): [Live Demo](#) [Code](#)

- **Tools:** ReactJS, HTML, CSS, JavaScript, Render, Github pages, Sequelize, REST API, Node.JS
- **Areas Covered:** Rest, Authentication, Email handling, Routing, Deployment
- **Objective:** To expand my knowledge on ReactJS and learn how to integrate it with a backend. A website like SOIL would allow me to demonstrate my knowledge of CRUD functionality while using industry relevant technologies and standards.

Weather Checker application : [Live Demo](#) [Code](#)

- **Tools:** ReactJS, HTML, CSS, JavaScript, Github pages
- **Inspiration:** Fun little project to get the weather using an API from openweather.com
- **Objective:** To develop a clean and easy to weather checking application for any city, useful for quick weather checks

Tic-Tac-Toe (Super Mario Themed): [Live Demo](#) [Code](#)

- **Tools:** HTML, CSS, JavaScript, Github Pages
- **Objective:** Develop a multiplayer Tic-Tac-Toe game using HTML, JavaScript, and CSS with DOM manipulation, featuring a fun and inviting UI, and integrating all project components for seamless gameplay against other players in a series.

Work Experience

DECEMBER 2022 – JUNE 2023

Technological Sales Representative, Optus:

- Negotiated pricing and contractual terms resulting in a 15% increase in my quarterly sales
